## WORK EXPERIENCE

### Groove Technology | Fullstack JS Devloper

*Jan 2022 - Present*

Worked on many projects as fullstack developer.

- First joined in a financial project as mobile developer. It focus on personal finance and lifestyle management.
- Worked as a full stack developer in MarketBase+ project, organising ideas and designing Graphql APIs.
- Worked as a Technical Lead on an HRM System project. Responsible for defining coding standards, designing and implementing a microservice architecture, establishing development processes, and overseeing system deployment.

**Tech-stack**: KeystoneJS, NestJS, PostgreSQL, React Native, NextJS, AWS, Docker.
**Projects:** Marketbase+, Xsights, Moorr.

### Gigacover | Front-end Devloper

*Nov 2020 - Dec 2021*

Worked for Gigacover company to develop an insurance application for users in Singapore and the Philippines.

- As working on the scrum model, we have a meeting on the first day of every sprint to get an understanding of the business works and take the task requests.
- Getting a new UI design and making it perfect on mobile.
- Support team member and review pull requests.
- Writing unit tests.
- Worked as Front-end and React native developer.

**Tech-stack**: React Native, ReactJs, Redux, Saga, Typescript.

## LANGUAGE

- Vietnamese
- English

### Freelancer | Fullstack Devloper

*May 2020 - Oct 2020*

Worked on a Chat app project in a freelance team.

- Making REST APIs.
- Get design prototypes and make UI.
- Develop and maintain the chat app with features like the Slack app.
- Unit test.

**Tech-stack**: React native, Redux, Websocket.

### Bitis | Backend Devloper

*Nov 2018 - May 2020*

Have worked on some projects such as Loyalty mobile apps, promotion campaigns, and staff mobile apps.

- Designing database relationship and implement REST APIs.
- Managing and assigning task requests to another member of the team.

**Tech-stack**: Strapi, ExpressJS, MySQL, and PM2.

### Memsitech JSC | Software Devloper

*Jan 2017 - Nov 2018*

Worked for the company on IoT projects.

- Getting sensor data by programming MCU.
- Receiving data sensors by BLE and put all of them to the MQTT server.
- Implement the Web application to display information.
