INTRODUCE

Within many years in software development, I am seeking a company where I could take part in creating a high-level application, a great system for the company business.

SKILLS

-
- Problem-Solving abilities
- Responsibility

LE NGUYEN ANH KHOA

FULLSTACK JS DEVELOPER

EDUCATION

HCM University of Technology (Bach Khoa)

Electronics & Telecommunications
GPA: 7.16

WORK EXPERIENCE

Groove Technology | Fullstack JS Devloper

Dec 2021 - Present

I am working on many projects in a flexible position.

- Have joined in mobile application project related to Finance and IOS, using React Native.
- As a full stack developer, design db schema and develop GraphQL queries based on business flows.
- Develop web applications, written in Nextjs and Vite.
- Manage code in the mono repo, using the NX tool.
- Manage, support, and review other pull requests.

Tech stack: KeystoneJS framework, GraphQL, PostgreSQL, React Native, NextJS, GitHub Actions, Docker, Typescript.

Projects: Marketbase+, Xsights, Moorr

Gigacover | Front-end Devloper

Nov 2020 - Dec 2021

Worked for Gigacover company to develop an insurance app for users in Singapore and the Philippines.

- As working on the scrum model, we have a meeting on the first day of every sprint to get an understanding of the business works and take the task requests.
- Getting a new UI design and making it perfect on mobile.
- Support and review pull requests.
- Writing unit tests.
- Worked as ReactJS and React native developer.

Tech stack: React Native, ReactJs, Redux, Saga, Typescript.

Freelancer | Fullstack Devloper

May 2020 - Oct 2020

Worked on a Chat app project in a freelance team.

- Making REST APIs.
- Get design prototypes and make UI.
- Develop and maintain the chat app with features like the Slack app.
- Writing unit test, automation test.
-

Tech stack: React native, Redux, S3.

Bitis | Backend Devloper

Nov 2018 - May 2020

Have worked on some projects such as Loyalty mobile apps, promotion campaigns, and staff mobile apps.

- Designing schema and making REST APIs.
- Managing and assigning task requests to another member of the team.
- Build and deploy systems with VPS servers.

Tech stack: Strapi framework, ExpressJS, MySQL, and PM2.

Memsitech JSC | Software Devloper

Jan 2017 - Nov 2018

Worked for the company on IoT projects.
- Handle read sensor data by programming MCU.
- Receive data sensors by BLE and put them to the MQTT server.
- Develop the Web application.
